

Sinclair Broadcasting uses the public airwaves and is licenced by the FCC in it's local markets to broadcast in the public interest. How can the FCC allow the partisan use of the airwaves to broadcast a one sided view of Presidential candidate John Kerry?

Sinclair's business practices have been called into question by the FCC: as the following statement from the FCC illustrates: With the transactions before the Commission today, Sinclair has crossed the line into behavior that the majority has found to violate the Commission's rules. In assessing a fine on Sinclair for this violation, the majority purports to stop the expansion of Sinclair's forays into multiple ownership, but in fact it merely points out that lines have been crossed, while allowing Sinclair to run over these lines and to continue its multiple ownership strategy.

DO NOT ALLOW THE PUBLIC AIRWAVES TO BE USED TO DISEMINATE DAVID SMITH'S ATTACK POLITICS.
